25-27 November Singapore

Learn how to BEAT the Markets Consistently

Attendance Limited

“Most traders suffer from common thinking... In the markets, common thinking will get you common results... common results means you will lose money!” *Jake Bernstein*

Dear Trader:

There's nothing like learning from a seasoned veteran. As you may know, I made my first trade in the 1970's. Since then I've not only accumulated a **VAST** amount of experience in trading, but I've also developed some **HIGHLY EFFECTIVE** methods for trading stocks and futures. I'm glad to say that some of my clients include the biggest names in the trading business. Why? Because they value the profit-making information and methods I give them!

Whether you're new to the markets, or an experienced trader, I believe that you can benefit substantially by spending 3 intensive days with me, learning **AND APPLYING** my trading methods in **REAL TIME**. Literally thousands of traders all over the world have attended my workshops and seminars and loved them. The feedback has been phenomenal!

Why a Trader's RoundTable?

In the past, my seminars have been run like classrooms. I teach **VERY SPECIFIC, 100%** objective systems and methods. Then I apply them in real time while attendees watch. **The Trader's Round Table (TRT)** will be very different. After you learn my methods on Saturday and Sunday, I will ask all of you to participate the decision making process. I will make the trades that we decide on and you will help me exit these trades as well, using the methods I will teach you.

By being part of the process you will benefit like never before! It's the **BEST WAY** to learn and I'll take all the risk...

Here is a trade recently triggered by only one of the methods you'll learn :

* At Grand Plaza Park Royal Hotel 10 Coleman St Singapore (near City Hall MRT)

Trader's RoundTable

Who SHOULD Attend?

Anyone who wants to see their success, accuracy and profits increase dramatically should attend.
Anyone who is having problems focusing on methods that work should attend.
Anyone who isn't using totally objective, rule based methods should attend.
Anyone who doesn't know how to maximize profits should attend.
Anyone whose confidence is failing due to bad methods should attend.
Anyone who wants to learn fabulous short-term (not day trading) methods should attend.

Who Should NOT Attend?

Frankly, after having been in the markets for so many years, I'm NOT interested in teaching traders who can't be serious or who don't really want to win. **Only the serious need attend.** If you truly want to learn what I believe are the BEST short-term trading methods out there, you'll join me and a VERY SMALL group of select traders in a learning process you will never forget.

Here's what the three days will cover:

- ✓ 5 VERY effective short-term trading methods
- ✓ Detailed risk management and profit maximizing strategies
- ✓ How to know what markets to trade and when
- ✓ How to spot the BIG short-term moves BEFORE they happen
- ✓ Entry and Exit strategies
- ✓ How to get optimum trade location
- ✓ How and when to take advantage of the news
- ✓ How to trade with exceptionally high accuracy
- ✓ When to AVOID markets
- ✓ How to implement your strategies effectively in real time
- ✓ How to get organized so you don't miss opportunities
- ✓ When to NOT TRADE
- ✓ How to maximize discipline and avoid emotional traps, And much more!

All strategies will be programmed for you on the Genesis™ Trading Platform.

and here's what some of Jake's students have to say...

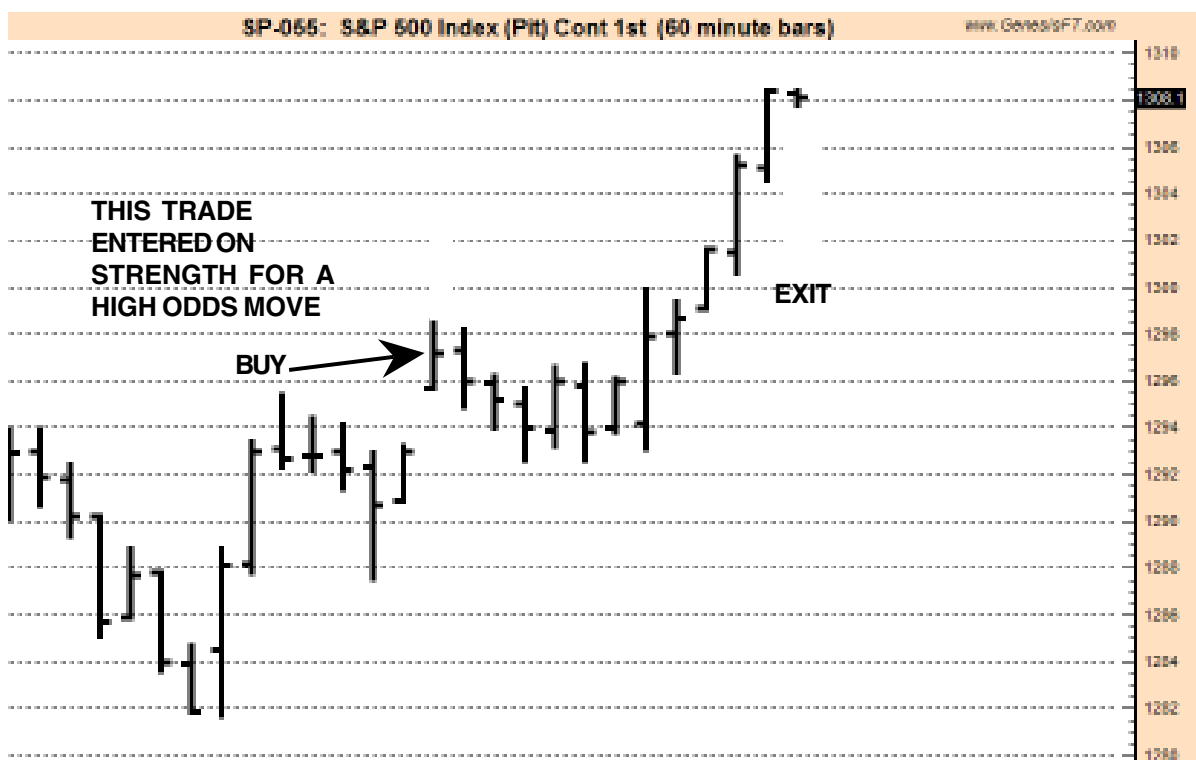

"Jake's... program gives you the parameters to help you make a profit and keep it...thanks" CW

"These are the results I could never have achieved prior to contacting you and will confirm that my confidence is at a level that I have never experienced before." O

"How did I do with my \$10,000 account? It grew to \$40,000 in four months. I don't see how you could listen to what Jake says and not make money in the markets!" RH

"Jake, once again thanks for your time in London . . . your explanations were simple, concise and easy to understand. I have already had two winning days in the FTSE 30 minute breakout system . . . and look forward to having many more." JM

And here's another trade triggered by one of the short-term methods you'll learn !

Singapore

Trader's RoundTable

Our Location

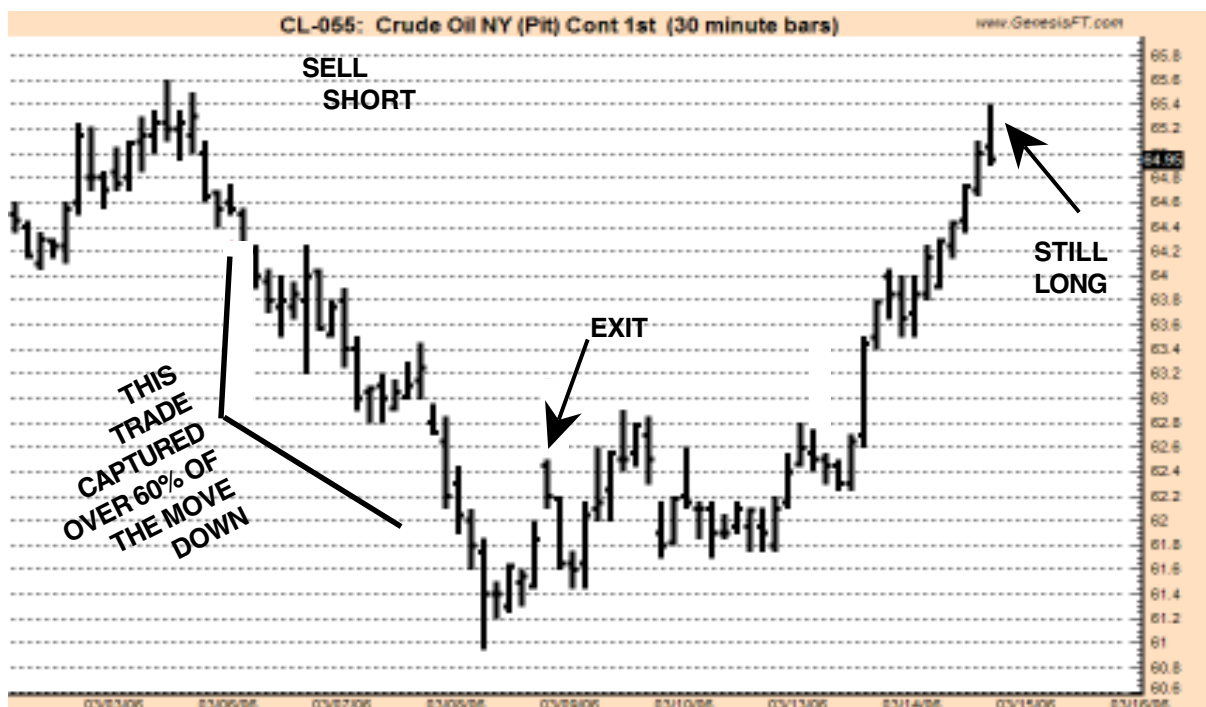

The TRT will be held here in Singapore for the first time ever. We have complete wireless and wired Internet access, state of the art teaching aids, and we are close to a quality hotel. I will provide lunch daily as well as dinner at the hotel on the trading day. Liontrader offices are only across the road from the hotel.

Why I'm limiting attendance...
Some trading seminars are designed to maximize attendance rather than maximize learning.

I could easily promote a seminar for 200 people at \$895 each and make a bundle of money for 3 days work. The TRT is NOT about that. Yes, I will be paid well for my teaching but my **primary goal is to give EACH and EVERY attendee the complete attention they deserve in order to provide the BEST learning experience money can buy.** You'll get 3 hard-hitting days of fabulous trading methods with personal attention and coaching.

(Did you like the last two signals? Here's another method I'll teach you)

I WANT EVERY ATTENDEE to help me in the decision making process, to participate and tell me what to trade, why and when. Only in so doing can the learning be transferred from me to you! I will only accept 60 in all on a first come first served basis (many have been taken by traders who have been waiting 5 or 10 years).

There are no discounts and no special deals. While I cannot guarantee you profits, I can guarantee you a solid, objective, effective and total learning experience. What you do with the knowledge I'll give you depends on you, but I will do my level best to keep you on a profitable course. Be quick to book as seats are limited.

The Big Trading Sewer

Are you tired of throwing money down the market sewer hole?

Are you tired of refinancing your account repeatedly because you're using methods that don't work? Are you trading by the seat of your pants, like most traders do? Did you once believe that losing money was part of your tuition in the markets but now it's been 5 years or more and you're still paying tuition but you have no graduate degree? If so, don't feel bad – you have a lot of company. End the frustration and start making money consistently! Come see me in November & let me teach you. Put your tuition to good use. Stop throwing your money down the trading sewer!

more comments

"I came to your seminar in Chicago to work on improving my discipline. I am happy to report that while I have lots of room for improvement, I am doing much better. Watching you do the real-time trading was a big help! Just want to say thanks!"JV
